PROFESSIONAL SUMMARY

Full-Stack Engineer with experience building internal tools, dashboards, automation systems, and database-backed applications that turn manual business operations into structured workflows. Strong across frontend UI, Node.js/PHP/Python backend logic, REST APIs, SQL schemas, and data processing automations. Has delivered admin/vendor/subscriber systems, role-based workflows, payment/subscription logic, and document-processing pipelines. Comfortable working asynchronously, writing clear implementation notes, asking why before building, and owning work from problem definition to delivery.

SKILLS & INTEREST

- **Internal Tools:** Dashboards, CRM/ERP modules, admin panels, role-based workflows
- **Data Workflows:** API integrations, data cleaning/structuring, document pipelines, automation
- **Backend & Database:** REST APIs, Node.js/PHP/Python, PostgreSQL/MySQL schemas, authentication/RBAC
- **Frontend:** Vue.js, React, Next.js, responsive UI, clean interfaces for operations teams

TECHNICAL SKILLS

- **Frontend:** Vue.js, React, Next.js, React Native, JavaScript, TypeScript, Tailwind CSS, responsive UI
- **Backend:** Node.js, Express.js, PHP, Python, REST APIs, authentication, role-based access control (RBAC)
- **Databases:** PostgreSQL, MySQL, Supabase, MongoDB, schema design, data modelling for changing requirements
- **Data & Automation:** Data cleaning, structured workflows, PDF/DOCX processing, Google Apps Script, API integrations
- **Tools & Collaboration:** Git, GitHub, Docker, Figma, WordPress, Dolibarr ERP, async documentation and handoffs

WORK EXPERIENCE

Freelance Full-Stack Software Engineer | Remote / Upwork |

May 2022 - Present

- Built full-stack business tools for clients across healthcare, logistics, SaaS, and web platforms, prioritizing operational clarity, workflow structure, and usable dashboards.
- Developed React Native healthcare workflows with secure role-based access, user state handling, and backend integration for care-related operations.
- Built custom Dolibarr ERP/CRM modules using PHP, MySQL, and Docker to support vendor, inventory, subscription, and supply-chain workflows.
- Integrated payment and subscription flows across custom and WordPress-based systems, including payment verification, membership activation, and transaction status handling.
- Delivered admin dashboards and client-facing interfaces with JavaScript frameworks, WordPress/PHP, responsive layouts, and Figma-guided UI decisions.
- Produced implementation notes, client handoff documentation, and technical breakdowns for remote/asynchronous collaboration.

- Led platform improvements for a legal technology business, spanning user dashboards, membership/payment workflows, frontend restructuring, and internal automations.
- Designed structured data workflows for legal content and case-processing operations, improving how information was captured, processed, and reused across the platform.
- Built Python and Google Apps Script automations that reduced repetitive manual data entry and document-handling work by 70%.
- Improved authentication, user journeys, and dashboard responsiveness, contributing to faster page interactions and cleaner user flows.
- Worked directly with leadership to understand business problems, challenge unclear requirements, and translate operational goals into technical execution.
- Researched competitor legal-tech products and proposed product/UX improvements based on real operational needs.

UI/UX Design Intern | Vlay Media | Nigeria

January 2023 - January 2024

- Designed user-friendly interfaces and prototypes for digital products using Figma, with emphasis on practical user flows and responsive layouts.
- Collaborated with developers to ensure design feasibility and accurate implementation of UI components.
- Translated vague product ideas into clearer flows, screens, and component structures for development handoff.

SELECTED PROJECTS

Document Data Pipeline & Processing Automation | Python, PDF/DOCX Processing

- Built an automation system to transform raw legal documents into structured, publication-ready outputs.
- Designed a repeatable workflow for cleaning, formatting, pagination, and document generation, reducing manual processing time by 80%.
- Handled layout and processing edge cases using python-docx and PyPDF2, improving reliability for recurring document operations.

Foodbank SaaS CRM | PHP, Dolibarr ERP, MySQL

- Architected a multi-role CRM-style platform with vendor, admin, and beneficiary workflows for inventory, credits, subscriptions, and redemption processes.
- Implemented payment verification and subscription lifecycle rules with JavaScript/PHP and MySQL to reduce manual activation work.
- Connected ERP logic to user-facing workflows, helping operational teams manage data and actions from a single structured system.

Legal Digital NG Platform & Workflow Automation | WordPress, PHP, Python, Google Apps Script

- Built membership/payment registration flows, confirmation logic, dashboard improvements, and automation scripts for internal operations.
- Improved user access flows and reduced repetitive manual work through scripts, structured data capture, and process documentation.

ENGINEERING APPROACH

- Start from the operational workflow: identify who uses the tool, what decision they need to make, and which data must be trusted.
- Design schemas and API boundaries around changing requirements instead of hard-coding one-off assumptions.
- Prefer simple, usable interfaces for internal teams over flashy UI that slows down daily operations.
- Communicate clearly in writing: problem summary, assumptions, edge cases, implementation notes, and handoff steps.
- Push back constructively when a requirement does not match the actual business problem or user workflow.

EDUCATION & CERTIFICATIONS

- Bachelor of Agriculture, Agricultural Economics - Obafemi Awolowo University, Ile-Ife, Osun State, 2023.
- Google UX Design Certificate - Google, 2023.
- Figma UI/UX Design Essentials Training - Udemy, 2023.
- Financial Modelling and Valuation Analyst (FMVA) - Corporate Finance Institute, 2022.
